

# OnHub Auth Helper Extension

## Privacy Policy

Date: Thursday, September 16, 2021

I would like to assert strongly that my extension DOES NOT:

- \* Collect analytics of any kind.
- \* Store or save any private or public user information.
- \* Make queries to my server or to any third-party.
- \* Request javascript code or any other resource from my server or any third-party.

My extension replicates the authentication procedure as implemented in Google's iOS apps and only queries the necessary API endpoints involved in said procedure. I do not benefit in any form from installing and using this extension.
